Kun Ming Goh

has successfully completed the online Specialization

Digitalisation in Aeronautics and Space

Digitalisation is changing our society and the working world, creating new processes and radically altering existing workflows. Aerospace is being impacted like every other scientific field and innovation without digitalisation is no longer conceivable. The three-part MOOC series "Digitalisation in Aeronautics and Space" is thus devoted to examining the transformations that have already occurred and forthcoming likely changes, posing the question: what will aerospace science be like in future and what will the influence of digitalisation be on research?

Prof. Dr.-Ing. habil. Dr.
h.c. Günter W. Hein

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
